

GOOSE REPELLENT!

for Geese

Only
\$85.00/gal

- **Eliminate Geese and Duck Droppings!**
- **One Gallon Covers 16,000 Sq. Ft. !**
- **Simple/Easy to Use and Apply!**
- **Low Cost/Effective Solution!**
- **Will NOT Harm People, Animals or Geese if E.P.A. Labels are Followed!**

Goose Repellent is a "taste aversion" remedy for problem geese and ducks. These birds eat grass. When applied correctly, Safer Goose Repellent renders their "grass food source" unpalatable...they hate the taste and move on!

Goose Repellent is ideal for parks, playgrounds, golf courses, lawn or any area where geese and ducks are a problem!

HOW EFFECTIVE IS BIRD•B•GONE GOOSE REPELLENT?

Studies have shown that goose repellent will significantly reduce geese and duck feedings.

- The first time that birds feed on the repellent, they will go to the water to wash the repellent off their beaks and feathers.
- Each time they return, they get another "dose" of the repellent, and soon learn that the grass or turf is not palatable.

HOW SAFE IS BIRD•B•GONE GOOSE REPELLENT?

- Bird•B•Gone Goose Repellent is completely safe if E.P.A. labels are followed
- Application rates are far below F.D.A. established standards for human consumption.
- Humans and animals may use the area after it has been treated.

RECOMMENDED APPLICATION FOR BIRD•B•GONE GOOSE REPELLENT:

- Goose Repellent should be applied at a rate of 1 part product to 12 parts water (1:12).
- One gallon covers 16,000 square feet.

APPLICATION DIRECTIONS:

- Mow / Cut the area of grass to be treated.
- Apply / Spray evenly on the area to be protected. (Allow Goose Repellent to dry before permitting human activity on the treated area.)
- Repeat application in 4 days.
- Do not mow the treated area for at least two weeks after the application process.
