

SHOCK TRACK For Birds!

Patented

BEFORE

NO-ARCING DESIGN!

AFTER

Actual Pictures from Condo Complex in Tampa Florida!

“Flow-Through” Design WILL NOT “Dam” Water!

No Need to Cut for Corners!

“Snug Fit” Connector Makes Connecting Tack Easy!

Bends in Any Direction!

- **No Arcing Design!**
- **NEW - NO STRETCH Design!**
- **NEW - Snug Tight Connectors!**
- **Low Profile - You Can't See It...Birds Hate It!**
- **Easy to Corner...No Need to Cut and Re-Connect!**
- **“Non-Short Circuit” Design WILL NOT “Dam” Water Behind It!**
- **Just Roll It Out & Glue It Up!**
- **Super Light - 100' Kit Weighs Only 10 Pounds!**
- **100' Kits Contain All Installation Hardware Needed...No Need to Buy Separate Hardware / Components!**

The Shock Track System is a unique electrically charged track that gives birds a mild electrical jolt when they land on it. Target birds will leave the affected structure where it is installed. Shock Track is the **ULTIMATE** in bird behavior modification.
