

CASE STUDY

Big Box Store Implements Bird Netting

Location: St. Louis, MO

Bird Problem: Birds were entering a warehouse through an open loading dock, causing damage to stored product.

Product Installed: Bird Net 2000™ Heavy Duty Netting

Product Details: Bird Net 2000™ is a heavy duty polyethylene netting used to block birds from unwanted areas. Bird Netting is the most efficient and effective way to prevent birds from roosting or nesting. Bird Net 2000™ carries an industry leading 10-year guarantee. Bird•B•Gone® offers a complete line of bird net hardware to allow for proper installation on a variety of surfaces and materials.

Pigeons were roosting and nesting on exposed beams inside the facility.

Bird Netting is an ideal bird deterrent for large open spaces.

Bird Netting installed under overhangs and eaves to prevent birds from nesting.

Girder clips are among the many hardware options available for installation of secure netting.
