ABOUT BIRD•B•GONE®

WHY BIRD•B•GONE®?
Our people, products, expertise, and training make the difference!
» Bird•B•Gone® products are humane, effective, and carry industry leading guarantees.
» The #1 most specified products by architects, engineers, and government agencies.
» We manufacture the majority of our own products at our facility in the United States.
» Our products have been used to successfully deter pest birds from high profile locations such as airports, schools, hospitals, military bases, historical buildings and more.
» Our bird control engineers have a combined 90+ years of hands-on experience.
» We offer free training and support for all aspects of bird control, including on-site training and technical support.
» We regularly host a free training course, Bird•B•Gone® University, that teaches everything from quoting a job to product installation.
» We offer same day and express shipping.
» Our products are available worldwide through a network of quality distributors.

WHO IS BIRD•B•GONE®?
The industry leader since 1992
Bird•B•Gone®, Inc. is the world’s largest manufacturer of professional grade bird deterrents.
Since 1992, our products have helped solve pest bird problems in commercial, industrial, recreational, government and residential settings across the globe.
Our superior products, excellent customer support and cutting-edge innovation have secured our position as the number one manufacturer and supplier of bird control products.
At Bird•B•Gone®, it’s more than just bird control products, IT’S FAITH, FAMILY AND FRIENDS!

OUR STORY
Julie and I started Bird•B•Gone® in 1992. Since we couldn’t afford anything, our first office was in our bedroom. The old oak desk pictured here was our first piece of “office furniture.” The desk held our telephone and fax machine. With your kindness and business, we have steadily grown. Today we own and operate our own manufacturing facility which makes and ships our products all over the world. The old oak school desk still occupies the same space in our home as a daily reminder of where we started.

» We thank you for your friendship.
» We thank you for helping us realize our dream.
» We thank you for your business and will continue to work hard to earn it!

PRODUCTS BY PEST BIRD

There are many factors to consider when choosing the right bird control product. It is important to do a site evaluation to determine the species of bird, location and the bird's behavior.

Not all products work for every situation and some situations may require multiple products. Choosing the correct product can mean the difference between success and failure.

BECOME AN AUTHORIZED INSTALLER

Grow your business with FREE on-site training

Earn your Authorized Installer Certificate at Bird•B•Gone® University—a free training course designed to teach the basics of bird control. Classes are taught by our bird control specialists and are held at the Bird•B•Gone® training facility in Santa Ana, California. Those who attend receive a Certificate of Completion which can also be applied as credit hours toward a Pest Control Applicator’s License in many states.

As an Authorized Bird•B•Gone® Installer, you will work with the highest quality bird control products and receive the best customer service. Whether you are looking to develop a primary bird control business or wish to add an additional service to your existing business, bird control can be a lucrative way to add extra dollars to your bottom line. We pride ourselves on the personal relationships we build with our customers and are here to assist you in building and growing your bird control business!

Topics include:

» How to market and make a profit in bird control.
» Perform a site evaluation.
» Choose the right product.
» Quote bird jobs.
» Install products (hands-on training).
» Install netting (hands-on training).
» Avoid problems.
» Learn to troubleshoot challenges.

Worldwide On-Site Training

At Bird•B•Gone®, our goal is not to “sell” you products, but to position you to make the best quality decisions when it comes to designing, specifying, and installing the right products to fit your job. Our bird control engineers have 90+ years of combined experience and will help you in all aspects of bird control.

Need to train a group of employees? Have a complex bird job? Bird•B•Gone® will provide the expertise necessary to bring success to your job. To schedule on-site training, contact our installation experts at 800.392.6915.

Sign up for one of our upcoming trainings to become an Authorized Installer.

PARTNER WITH BIRD•B•GONE®

Need an Authorized Installer?
If you don't have time, resources, or expertise to solve a bird problem, we can connect you to an Authorized Bird•B•Gone® Installer.

We have trained an extensive network of Authorized Installers who install our line of professional bird control products around the world. Whether it's a commercial, residential or an industrial setting, our installers have the experience to solve your pest bird problem. We work closely with our installers to ensure they are qualified to rid the pest birds and provide exceptional customer service.

Quality Guaranteed
Bird•B•Gone® products go through an extensive quality control process before they leave our warehouse. All products are hand inspected and signed as they are packaged. This allows us to offer the industry's longest guarantees.

- Stainless Steel Bird Spikes: 10 Years
- Polycarbonate Bird Spikes: 5 Years
- Black Bird Net 2000™ Heavy Duty: 10 Years
- No-Knot Netting: 10 Years
- Bird Wire: 5 Years
- Bat Netting: 10 Years

Shipping
Bird•B•Gone® provides the fastest and most efficient shipping in the industry. We manufacture our own products. This enables us to offer customers convenient and expedited shipping options like same-day shipping! We use traceable shipping methods to guarantee your products arrive on time. Wherever you are in the world, Bird•B•Gone® will ship to you!

Specifications & CAD Details
We are the #1 bird control company specified by architects, engineers and government agencies. Since 1992, we have worked with the AEC industry in the design and implementation of effective, humane, and cost efficient bird control solutions.

Specifications, CAD, and BIM details can be found on our website. If you need help specifying bird control on a project, contact our bird control experts to help you choose the right product and place you in contact with an Authorized Installer.

INNOVATION
At Bird•B•Gone®, we make it our business to stay on top of the latest advancements in the bird control industry.

We are constantly improving current technologies and developing new products to meet our customers' needs. We strive to provide the most effective, efficient and reliable bird control methods on the market.

Bird•B•Gone® has 58 issued patents worldwide and 35 pending patent applications—the most in the industry!

Some of our outstanding patented products:

- Bird•B•Gone® invented and patented the original Plastic Bird Spike. This revolutionary bird control tool is one of our best sellers.
- Bird Jolt Flat Track® received another patent on its innovative anti-arcing and trough design.
- Bird•B•Gone® Stainless Steel Bird Spikes™ patented “bend and crush” design ensures that the spikes stay firmly secure in their base.

Because Bird•B•Gone® is only involved in bird control, we make it our business to stay on top of the latest advancements in the industry. We continue to provide our customers with the products and services that give them a leading edge in bird control.
OUR EXPERTS

More than 90+ years of combined experience in the bird control industry!

A company or organization is only as good as its people and Bird•B•Gone® has the best! Our bird control experts lead the industry. We’ve seen it all! Everyday we consult with large and small companies worldwide, helping them avoid costly mistakes and create “predictable success.”

Mark Gist
31 years experience

“After 30+ years of installing and selling bird control, I joined the Bird•B•Gone® team in 2016. I look forward to supporting, training, and helping our customers grow their bird control business.”

Jeff Watts
15 years experience

“I deal with a variety of industries on a daily basis. Every day is unique. From architectural jobs to international skyscrapers, I get to help people across the globe create bird-free areas.”

Chris Fields
12 years experience

“I have the pleasure of working with architects and engineers every day helping them plan for the future. Designing and developing plans to protect old and new structures from bird debris is something I take pride in.”

Bryan Donoho
8 years experience

“It is a privilege to work for a company that promotes personal growth and positive change in the lives of its employees and customers. Whether it be solving a customer’s bird problem or facilitating installation trainings, Bird•B•Gone® always seeks to offer more than bird control.”

Scott Swanson
20 years experience

“Bird•B•Gone® is my home and I consider my customers as my friends. I have worked on amazing projects with some of the smartest people in the industry, giving me the chance to experience things I wouldn’t trade for anything.”

Shaun Johnson
7 years experience

“From business owner to homeowner, I enjoy recommending the right product for each customer’s situation. It’s great to have quality products available through various points of distribution worldwide!”

Aron McKay
2 months experience

“With over 10 years of global building industry experience, partnering with architects, engineers, installers, home owners, distributors and retailers, I’m eager to help you get the best solution for your pest bird issue today!”

Alan Roniss
3 years experience

“It is always a pleasure helping a customer rid his or her property of pest birds. It doesn’t matter if it’s a home or a commercial building, Bird•B•Gone® will help you create a bird-free environment.”
WHY BIRD CONTROL?

Inventory Damage
Droppings can damage products and contaminate production lines.

Work Stoppages
Employees will not and should not work in areas that are unsafe due to an accumulation of droppings.

Slip and Fall Risk
Droppings can be slippery. If a customer or employee falls they could get seriously injured, and sue the building owner.

Health Code Violations
Pest bird droppings found in food processing plants, restaurants, storage facilities or other areas may violate health codes resulting in fines, legal action, or closures.

Clogged Drains
Droppings and nesting materials regularly clog drains, causing damage during heavy rains.

Property/Equipment Damage
Droppings are acidic and can corrode through paint, roofing materials and fabrics. These will need restoration or complete replacement.

Cost of Cleanup
Businesses that clean up after birds on a daily or weekly basis incur high clean-up costs.

BIRD CONTROL IS AN INVESTMENT

» Eliminate safety and health hazards - decrease your liability
» Eliminate the spread of diseases to your employees and patrons
» Decrease expenses/costs on maintenance and repair
» Protect your property value
» Improve and protect your image

Health Risk
Birds, droppings, and nesting materials can carry up to 60 different diseases that can be passed to humans and animals.

Brand Image
Birds on a ledge or sign, or droppings covering a sidewalk will send a message to visitors that the business is careless and should not be trusted.
Preventing birds from landing on ledges is an important and crucial step in bird deterrence.

Bird spikes, from Bird\-B\-Gone®, offer an effective and humane deterrent for larger bird species like pigeons and seagulls. We invented and patented the first plastic bird spike and offer highly durable construction that carries an industry leading Bird\-B\-Gone® guarantee for all products. Stainless steel bird spikes are virtually invisible and our plastic bird spikes are available in seven colors.

Spikes are easily installed on ledges, roof peaks, I-beams, parapet walls, conduits, signs, flat or curved surfaces. They are designed to blend with a building’s color scheme and design. Bird spikes provide a cost effective and long term solution to deter nuisance bird infestations and protect a property from damage.
ADVANTAGES & BENEFITS

Bird•B•Gone® Stainless Steel Bird Spikes™ create an uneven surface preventing birds from landing on flat or curved areas. Spikes come pre-assembled in 2’ sections and are made of stainless steel pins in a polycarbonate base.

» #1 specified bird spike by architects contractors and government agencies.
» The lowest price and the longest guarantee.
» Virtually invisible.
» Humane, will not harm birds.
» Easy to install. Can be glued, screwed, or tied down.
» Will not cut or injure the installer.
» Patented "bend and crush" design for permanent installations.
» 2’ (61 cm) lengths. Up to 40 spikes per foot in linear array. Cuts labor time in half.
» No-nest design. No gap spacing to deter birds from roosting or landing.

**WHERE TO USE**
Adapts to any size girder up to 1” thick

**MATERIAL**
Stainless steel spikes manufactured into a UV protected polycarbonate base with aluminum clamp

**BIRD PRESSURE**
Light to Medium

**GUARANTEE**
10 years

birdbgone.com
PREPARATION

The first step prior to installing bird spikes is to clean and dry the area where spikes will be installed. Bird•B•Gone® offers cleaning supplies to get the job started off right.

See page 78

ADHESION

Surface should be clean and dry before installation. Select width of bird spike based on surface to be covered. Glue, screw, or tie down to surface.

See page 78

Watch our spike installation video at: www.birdbgone.com/spikeinstall
ADVANTAGES & BENEFITS

» Lowest cost commercial bird spike.
» Will not harm birds; virtually invisible.
» Non-conductive. Will not interfere with electrical or communication transmissions.
» Durable and super strong.
» Break-away points, no tools necessary.
» UV protected and weatherproof. Won’t be affected by extreme temperatures -200° F to 310° F (-129° C to 154° C).
» 2’ (61 cm) lengths, cuts labor time in half.
» Easy to install. No maintenance. Can be glued, screwed, or tied down.

POLYCARBONATE BIRD SPIKES™

Glue trough makes gluing easy
Offset pre-drilled holes for screws or adhesive
Notches break away for smaller pieces

INSTALLATION

PREPARATION

The first step prior to installing bird spikes is to clean and dry the area where spikes will be installed. Bird•B•Gone® offers cleaning supplies to get the job started off right.

See page 78

ADHESION

Surface should be clean and dry before installation. Select width of bird spike based on surface to be covered. Glue, screw, or tie down to surface.

See page 78

Watch our spike installation video at: www.birdbgone.com/spikeinstall
Bird•B•Gone® partners with an authorized installer to donate and install bird spike to high school in surrounding community.

Bird•B•Gone®, Inc. extended its foundational values of “Faith, Family, and Friends” to include a local high school in the surrounding community. As part of a multi-level service project, Bird•B•Gone® reached out to the school to offer a donation of bird control products and installation services to help resolve an unwanted pigeon presence. Located within the center of the school’s campus, there is an outdoor lunch area that provides both shelter and food for pest birds. With the assistance of a local authorized installer, Kevin Hearne from Zapp Pest Management, Bird•B•Gone® provided and installed bird spikes to deter the birds.

The high bird pressure area was located above the lunch area, within which the students would leave behind left-over portions of food and drinks. The birds would land and rest on the north most building, upon which they were provided both protection as well as a “bird’s-eye” view of the campus. Once the lunch period had ended, the birds would promptly move to the ground and scavenge for the left-over food. With easy access to the three necessary components of living (food, water, and shelter) this campus was a perfect location for pest birds.

“There was a clear presence of the pest birds on this campus, however it was not until we observed and recorded the recurring activity of the birds that we understood the proper way to deal with the problem,” explained Kevin Hearne. “Once we had conducted a proper Bird•B•Gone® instituted Site Evaluation we were prepared to perform the necessary bird exclusion processes including both site cleanup and product installation.”

For this particular bird control job, the process included removing worn-down product, cleaning and sanitizing the installation area, and installing 8-inch Stainless Steel Bird Spikes™ to the ledge using E6100 adhesive.

As a result of this service installation, Bird•B•Gone® excluded the majority of pest birds from the campus, effectively minimizing the pest problem and furthering the exceptional academic environment of the school.
Birds can create a major problem for property owners and managers.

For strip malls, warehouses, loading docks, hangars and other large structures, birds can quickly become a very costly nuisance. Birds often nest under awnings, overhangs, open roofs and covered beams in breezeways. One of the most effective and humane ways to keep birds from the property is to create a physical barrier to seal them out with specially designed bird netting.

About Bird•B•Gone®’s Bird Netting

» Bird•B•Gone® Bird Netting is the #1 specified bird netting by architects and government agencies.

» The netting is specially fabricated of a tough UV-stabilized polyethylene mesh; rot-proof, waterproof, and flame resistant.

» Designed to withstand a wide range of temperatures; meets the requirement of ISO 1806 & 9001 Protocol Mesh Test for quality and mesh break strength.

» Non-conductive, so it can be used around electrical systems and RF transmission systems without worrying about shorts or interference.

» Available in stock sizes and custom cuts to fit a variety of needs and applications.

» Available in three mesh sizes and comes in three colors to blend in with the area of installation.

» Thoroughly inspected, tagged, and signed before leaving Bird•B•Gone’s® warehouse.

» To ensure fast efficient installs, Bird•B•Gone® offers all the necessary hardware for a successful installation.

Once installed, the netting is virtually invisible. Bird•B•Gone® Bird Netting is backed by industry leading guarantees.
ADVANTAGES & BENEFITS

Bird Net 2000™ Heavy Duty Bird Netting is a polyethylene knotted net used to block birds from entering unwanted areas. Bird Net 2000™ is the most efficient and effective method for excluding birds.

» #1 specified bird netting by architects contractors and government agencies.
» The strongest netting at the lowest price.
» UV-stabilized, rot proof, and waterproof.
» ISO 1806 and 9001 protocol tested.
» Available in 3 colors to blend in with area of installation and virtually invisible.
» Sub-zero stable and 270° F (132° C) melting point.
» Non-conductive.
» We offer all the necessary hardware to install bird netting.

INSTALLATION HELP

Bird•B•Gone® will connect you with a network of Authorized Installers across the globe who professionally install Bird Net 2000™. If you are looking to install netting yourself, our team of bird control engineers can help you with technical assistance and training.

*All custom cuts 100 sq. ft. minimum

Watch our net installation video at: birdbgone.com/netinstall
NO-KNOT NETTING

ADVANTAGES & BENEFITS

SOFT ON YOUR HANDS: No-Knot Netting is a heavy duty, flame resistant polypropylene knotless bird net used to block birds from entering unwanted areas. No-Knot Netting is made from a UV-stabilized mesh and excludes all birds. No-Knot Netting is installed in the same manner as the Bird Net 2000™.

» 3/4” mesh excludes all birds.
» Super strong, light and easy to install.
» UV stabilized, rot proof, and waterproof.
» ISO 1806 and 9001 protocol tested; 40 lb. burst strength.
» Multi-stranded polypropylene fiber.
» High resistance to acids and alkalies and non-conductive.
» Virtually invisible.
» We offer all the necessary hardware to install bird netting. Uses the same Bird•B•Gone® installation hardware as heavy duty knotted net.

FREE extra foot for custom cuts!

INSTALLATION AND TOOLS

PROPER INSTALLATION OVERVIEW
To properly install a netting system the following steps must be accomplished:

1. Install all anchors using the correct parts for the building material you are attaching to. These will be the foundation for your netting.

2. Run the cable, turnbuckles and ferrules through your attachments and tighten the cable. The tension should be similar to that of a guitar string.

3. Once this is done, you are ready to attach the net to the cable. Attaching the net to the cable is the most time-consuming part of the process.

4. After the net has been installed, add a zipper for access to lighting and plumbing fixtures, safety equipment and such.

ANCHORING (CORNER AND INTERMEDIATE ATTACHMENTS)
There are two types of anchors—corner attachments and intermediate attachments.

1. Corner attachments are used where the cable begins and ends, and generally at every 50 feet of cable length. They are under the most pressure and must be the strongest part of the system.

2. Intermediate attachments hold the cable to the structure. They must be installed every at foot to every foot and a half between the corner attachments.

FASTENERS

Fasteners are used to secure the cable and tighten the straining wire to prevent sagging or drooping.

Straining wire is attached to the anchors using ferrules. Ferrules are used at the first corner attachment and later at the turnbuckle. Run two ferrules through the end of the cable. Then loop the cable through the first corner attachment and back through the ferrules. Crimp the ferrules twice to lock the cable into place with a ratchet crimp tool.

Run cable through all intermediate attachments and finally though the turnbuckle at the end of the cable run. Turnbuckles are used to tighten your straining wire. Make sure the turnbuckle at the end of the run is fully open before securing and tightening the cable.

HOG RINGING

Once your perimeter is established, netting is attached to the cable using a hog ring tool. This tool loops a metal ring around the net and the cable. You can apply a hog ring every other square when using ¾” netting.

Start on one corner and hog ring on a straight line leaving 2-4 squares of excess mesh. Stay on the same row of mesh or your netting will be uneven at the end. Proceed for about 3 feet and then return to the corner. Hog ring the net in the other direction.

At this point you should have a nice corner of netting attached to the cable. Proceed to finishing one side completely and move along to complete the installation on the remaining sides.

Once your net is installed, trim the excess netting and inspect all attachments for strength.

ACCESSORIES FOR ACCESS AND TOOLS

After the net has been installed there may be a need to access lighting and plumbing fixtures, safety equipment and such. Installing a zipper offers easy open and close access.

Keep the zipper closed, apply the hog rings to the cloth portion of the zipper, and attach the zipper to the net.

When you are done attaching both sides of the zipper with hog rings, open the zipper and cut the middle strands of net. This creates a hole that can be opened and closed.

POND NETTING

ADVANTAGES & BENEFITS

» Most efficient & effective method for excluding birds.
» Protect water fowl from oil and contaminated water.
» Prevent costly lawsuits from bird deaths.
» Durable construction for harsh environments.
» Break strengths from 116 lbs. to 740 lbs.
» Available in several mesh sizes from 3/4” to 4”.
» Custom sizes; call to order.

WHERE TO USE
Tailing ponds, retention ponds, water collection sites, oil pits

GUARANTEE
10 years

MATERIAL
High density UV protected polyethylene knotted netting (HDPE)
Nylon pond netting (made in the USA) is also available

FLAME NET

ADVANTAGES & BENEFITS

» Ideal for use in inside applications such as airplane hangars, large warehouses, and even residential installations.
» Netting extinguishes itself using a revolutionary red strand of filament.
» Will stop itself from burning when exposed to open flame.
» Break strength in excess of 33 lbs.
» Easily installed with same hardware as Bird Net 2000™
» Test report available upon request.
» Industry leading 10 year guarantee.

034FR50X100 50' x 100'
034FRCUSTOM Custom* Includes extra free foot

FEATURES

*All custom cuts 100 sq. ft. minimum.

birdbgone.com
Headquartered in Texas, H-E-B is one of the largest independent food retailers in the nation. As a preemptive measure to keep pigeons and starlings away from outside grocery displays and other areas around H-E-B locations, Gulf States Bird Control installed Bird•B•Gone® Heavy-Duty Bird Netting.

**Issues to be addressed:** At each of the H-E-B stores, Gulf States Bird Control is installing durable heavy-duty netting in order to protect storefront produce areas. Without netting, these pest birds are free to leave droppings, resulting in potentially hazardous areas for customers.

**Product Installed:** Bird•B•Gone® Bird Net 2000™ Heavy Duty Netting in ¾-inch mesh and black color.

**Challenges to Overcome:** Gulf State Bird Control has the experience, tools and hardware necessary for efficient and successful installations on the existing H-E-B stores. However, the main challenge to over come involved installing the net onto new store locations currently under construction.

**Solution:** Bird•B•Gone®’s heavy-duty bird netting ensures that the areas on and around the grocery stores are free of pest pigeons and starlings. The highest priority is that the netting keeps produce areas free of disease-carrying bird droppings. Gulf States Bird Control has been using Bird•B•Gone®’s heavy-duty bird netting for over 18 years—with no callbacks. The netting has the ability to withstand a variety of extreme environments. Occasionally, the temperature drops down to as low as 30 degrees in Texas but the netting continues to hold up. The areas on and around H-E-B grocery stores—old and new—are free of pest pigeons and starlings. Produce areas are free of harmful bird droppings. Once Bird•B•Gone® Heavy-Duty Netting goes up, birds stay out.
Many customers face expensive clean-up bills, removing birds and bird droppings from signage, windows, awnings and walkways. Restaurant owners and others who deal with food face fines and shutdowns as health inspectors note evidence of bird droppings in or around their property. Fortunately, there is a solution to the pest bird problem.

**Harmlessly “Educates” Pest Birds to Stay Away**

Bird•B•Gone® low–profile electric track bird deterrent system prevents birds from landing or nesting in unwanted areas. The unique electrically charged tracks impart a mild electrical shock when birds land on them. The shock will not harm birds, but will condition them to avoid the area.

**Multiple Birds, Multiple Locations**

The Bird Jolt Flat Track® system is ideal for use in a multitude of applications where pest birds habitually perch and roost. This low-profile solution is ideal for ledges, rooflines, parapet walls, I-beams, eaves, signs, and virtually any flat or curved surface. Electric track is highly effective for all birds including pigeons, sparrows, gulls, starlings, crows and many others.
Scott Swanson
Bird Control Expert
ADVANTAGES & BENEFITS

Bird Jolt Flat Track® is a low profile electrical track system which produces a mild electrical “jolt” when birds land on it. It uses copper knitted wire mesh, in a continuous “tube-in-tube” stocking design. This allows for greater conductivity, strength and reliability.

» The ultimate product for modifying bird behavior.
» #1 specified electric track by architects and government agencies.
» Does not harm birds.
» Patented “anti-arcing” design means the ultimate in safety.
» Effective for both small and large pest birds.
» Crush proof; will continue to work even if stepped on by window washers or building maintenance crews.
» Glue troughs allow for easy installation with construction grade adhesive.
» Completely flexible; can bend 360°.
» Low profile and virtually invisible. Only 1/4” (6.35 mm) tall.
» “Snug-fit” connectors make it the easiest shock system to install.
» Comes in easy-to-dispense box and can be cut with scissors.
» Bird Jolt Flat Track® Kits available.

**THE BIRD JOLT FLAT TRACK® KIT**

The Bird Jolt Flat Track® Kits come in a lightweight, easy-to-dispense box with carrying handle. Each kit contains:

- Bird Jolt Flat Track® (Choose Color) 100’ (30.48 m)
- Lead-in Connector Loops (2 each)
- Snug Fit™ Track Connectors (3 each)
- Bilingual Warning Labels (10 each)
- Snug Fit™ Corner Connectors (3 each)
- Blue Wire Connectors (10 each)
- Lead wire and charger sold separately.

**TWO MINUTE TUESDAY PRO BIRD CONTROL TIPS**

[birdbgone.com/protips](http://birdbgone.com/protips)

Bird•B•Gone® posts quick videos with our bird control tips. Hear from Jeff, Scott and other members of our bird control team on useful, practical tips related to bird control and successful product installations.

[Watch our track installation video at: www.birdbgone.com/trackinstall](http://www.birdbgone.com/trackinstall)
A PGA building in Arizona was having pest bird problems. Bird feces and nests were creating unhealthy and hazardous conditions for staff and guests. To make matters worse, a poorly installed net had fallen around the facility’s air handlers. As the job posed a number of installation challenges, Chemtech utilized the on-site training option offered by Bird•B•Gone® to:

1. Offer hands-on instruction to team members
2. Highlight and clarify installation techniques
3. Confirm the selected products for the job
4. Ensure that all products are installed properly

**Goal of Installation:** Prevent birds from landing on horizontal surfaces. Block birds from entering unwanted areas. Remove the old cabling, anchors, and net that were poorly installed and had fallen around the air handlers.

**Product Installed: Bird Jolt Flat Track®**

To prevent birds from landing on the horizontal surfaces the team chose to install Bird Jolt Flat Track®. Bird Jolt Flat Track® is an electric track system that produces a mild electric shock when birds land on it. The non-intrusive, low profile and patented anti-arching design made this an ideal choice. The electric track system was properly installed in various “high bird pressure” areas and has successfully deterred the birds and kept them away.

**Product Installed: Bird Net 2000™**

To block birds from entering unwanted areas, the team chose to install the most efficient and effective bird exclusion product, heavy duty black 2 in. mesh bird netting – Bird Net 2000™. The old cabling, anchors and net were removed. New heavy duty netting was properly installed and correctly anchored.

**The result:** A humane and highly effective bird control installation that keeps birds and their droppings away from the building.
Bird•B•Gone® has a wide variety of effective and humane products to deter pest birds.

Physical, visual, and sound deterrents make areas inaccessible unstable, and uncomfortable for birds, keeping them from landing, roosting or nesting, and forcing them to move on to a new location.

- **Physical deterrents** are ideal for use on flat surfaces in concentrated areas like ledges, parapet walls, windowsills, roof edges, and more.

- **Visual bird deterrents** create distraction zones that confuse the birds causing them to flee the area.

- **Sound deterrents** use bird distress and predatory calls to startle and warn birds so they leave the targeted area.
Azael Silva
Quality Control Engineer
The unique design of Bird Slope™ makes it impossible for birds to land or roost on 90° areas like eaves and ledges.

- Prevents birds from landing and nesting on ledges up to 5.5” (13.97 cm) wide.
- Unique “Slope Extender” increases coverage for areas up to 10.5” (26.67 cm) wide.
- Effective for both large and small birds.
- Ideal for parking garages, I-beams and 90° ledges.
- Glue trough on underside for easy adhesive application.
- Easy-to-install End Caps prevent birds from getting behind Slope.
- Made of a UV-protected outdoor grade PVC plastic.
- Longest guarantee and lowest cost.
- Fast installation with 4’ (1.22 m) sections.

## INSTALLATION

To install: Surface should be clean and dry before installation. Bird Slope covers a 5.5” ledge; for larger ledges Extenders are available. Glue onto surface using glue troughs. End Caps should be installed to prevent birds from getting behind Slope.

BIRD WIRE

ADVANTAGES & BENEFITS

Bird Wire is a post and wire system that provides an unstable landing area for pigeons, seagulls, or crows. Ideal for areas where aesthetics are a concern, the low-profile Bird Wire involves a series of stainless steel posts supporting nylon coated 316 stainless steel wire that is tensioned between the posts using springs.

- #1 Bird Wire system specified by architects.
- CAD details and specifications available at birdbgone.com.
- Low profile and low visibility.
- Low maintenance.
- Ideal for hand rails.
- Affordable pricing.
- Industry leading 5 year guarantee.
- Approved for use on federal and state government structures.

SOLAR PANEL BIRD DETERRENT KIT

ADVANTAGES & BENEFITS

Rooftop solar panels create an ideal environment for pigeons and other pest birds to nest and roost. The panels provide shade from the hot sun, security from predators, and an easy in-and-out vantage point for birds. The best way to address this problem is to install bird deterrents, when the solar panels are first installed or before the pest birds arrive.

» The weather-resistant mesh effectively blocks pest birds from nesting and roosting under panels.
» No drilling required.
» Mesh is virtually invisible once installed.
» Clips will not scratch or affect integrity of solar panels.

ADVANTAGES & BENEFITS

The Instant Repair Patch is an easy-to-use, UV activated patch that creates long-lasting repairs. This reinforced polyester patch is perfect for making watertight, durable seals on a variety of objects. Repair minor pest entrance points on warehouses, big box stores, homes and other structures to exclude birds and pests from intrusion in unwanted areas.

» No mixing, measuring, or mess.
» Will not rot or rust, sandable, can be drilled or taped, accepts paint in 1 hour.
» Fast curing - in as little as 5 min. depending on UV intensity.
» Bonds to all surfaces except Polypropylene (PP).

The Bird Spider 360°® is a humane stand-alone physical bird deterrent that is used to prevent birds from landing. The Bird Spider 360°® can be used in a variety of settings including: Boats, docks, Biminis, light posts, air conditioner units, skylights, dock pilings, and more!

» Bird Spider 360°® is a visual bird deterrent used to scare large birds away from concentrated areas.

» This bird deterrent is humane, safe, and will not harm birds.

» No-tangle "arms" bounce and sway in the wind, creating a visual distraction zone so birds will not want to come near the area.

» Pre-assembled, easy to install; available in 2 ft., 4 ft., 6 ft., and 8 ft. diameters for optimal coverage.

» Patented design has been high wind tested – will not break or fall off in high wind areas.

» Preassembled and easy-to-install.

DETERRENTS - SOUND

ADVANTAGES & BENEFITS

The Bird Chase Super Sonic™ is an outdoor sound device used to deter pest birds. Distress and predator calls from 24 types of birds are broadcast for two minutes at ten minute intervals to scare pest birds from large open spaces.

» Includes goose deterrent sounds.
» Low cost method of protecting your property.
» Programmable, you can choose your target bird.
» UV protected and water resistant.
» Can be programmed to turn on/off automatically at night.
» Covers 1 acre. Add additional speakers for coverage up to 5 acres.
» 30-day unconditional money back guarantee.
» 100 ft of speaker wire for each speaker.

SOLAR BIRD CHASE SUPER SONIC™

ADVANTAGES & BENEFITS

The Solar Bird Chase Super Sonic™ is ideal for use in large open spaces where there is no access to a power source. Solar panels charge and store energy to keep the system operating during inclement weather. To install: Place unit in sun for 8 hours to charge. Optionally, you can plug unit in and charge for 4 hours. Once it is fully charged, place the unit on a flat surface to receive sun for most of the day for optimal charging. Select the proper bird setting from the menu, adjust volume, and watch birds disappear.

» Unit powered by sustainable solar energy.
» Deters birds from large open spaces with recorded bird distress and predator calls.
» Covers 1 acre.
» Water resistant – meant for outdoor use.
» Programmable.
» Light sensor automatically powers down the deterrent when the sun goes down.

birdbgon.com
ZON™ MARK IV BIRD SCARE CANNON™

ADVANTAGES & BENEFITS

Designed to produce a regulated sonic blast to scare pest birds and wildlife, ZON™ Mark IV Birds Scare Cannon™ will protect 1 to 5 acres, depending upon topography. Ideal for use in agricultural fields, vineyards, orchards, airports, or any other large open area where pest birds are problematic.

» Detonation intervals adjustable from 40 seconds to 30 minutes.
» Economical – 20 lb. propane tank delivers about 17,000 explosions.
» Light for easy mobility – weighs only 8.4 kg (18.5 lbs.)
» Operates in strong wind conditions.
» Stable frame design prevents movement when detonating.
» Brass seated electrode with fixed-point setting delivers consistent spark.
» Optional ZON Tripod raises & rotates cannon for maximum effect and range.

ZON™ ELECTRA BIRD SCARE CANNON™

ADVANTAGES & BENEFITS

» Built-in timer, multi-shot, automatic, random, on-demand modes, and hose facture protection regulator.
» Three random modes to eliminate animal tolerance by randomly varying the time after each shot series.
» Detonation intervals adjustable from 1 to 60 minutes.
» No moving parts to replace or adjust.
» Reliable printed circuit board controls gas flow and ignition.
» Can be mounted on vehicles or vessels for aggressive scare tactics.
» Stable frame design prevents movement when detonating.
» Optional ZON Tripod raises & rotates cannon for maximum effect and range.

The Agrilaser® Lite repels birds during lighting conditions of 20,000 Lux or less—conditions comparable to cloudy weather. Birds perceive the laser beam as an approaching physical danger and fly away in search for safer grounds. There is no habituation effect. After consistent use birds will perceive the area as unsafe and will not return.

Why choose Autonomic:
» 24/7 prevention of bird presence
» Easy to deploy in many situations
» Immediate and long-lasting results
» AC power or solar-energy powered

The Agrilaser® Handheld comes in three models with different laser output power: Agrilaser® Handheld, Handheld 200 and 500. Choosing the right model is essential in order to generate a laser projection with sufficient contrast for effective bird dispersal.

Why choose Handheld:
» Range up to 2,500 meters
» Fast and long-lasting results
» Suitable for repelling most bird species
» Animal and environmentally friendly

The Autonomic is a fully automated bird repelling system that provides continuous bird repelling capability after a one-time configuration. When the Autonomic is operational, birds perceive the system’s approaching laser beam as a physical danger and disperse to seek safety. In contrast to conventional deterrent methods, birds will not become accustomed to the Autonomic. They will consider the area as unsafe and will not return.

Why choose Autonomic:
» 24/7 prevention of bird presence
» Easy to deploy in many situations
» Immediate and long-lasting results
» AC power or solar-energy powered

ADVANTAGES & BENEFITS

Bird•B•Gone® Reflect-a-Bird™ is a silent wind-powered spinning visual bird deterrent that effectively scares birds away. The mirror-like design uses sunlight and wind to create a distraction zone that confuses pest birds causing them to flee the area. For best results, use Reflect-a-Bird™ in conjunction with other visual or physical bird deterrents.

» Great for use on buildings, boats, and within agricultural settings.
» Easy to install, extremely effective.
» Angled design (up to 90 degrees) allows Reflect-a-Bird™ to be installed in various directions.
» Can be glued, screwed, or tied down to flat surfaces.
» Weatherproof aluminum and plastic construction.

TWO MINUTE TUESDAY PRO BIRD CONTROL TIPS

Bird•B•Gone® posts quick videos with our bird control tips. Hear from Jeff, Scott and other members of our bird control team on useful, practical tips related to bird control and successful product installations.

birdbgone.com/protips
Soon after the construction of the two-million square foot Orange County Convention Center concluded, birds quickly began landing and roosting on the facility’s support beams. The new convention center provided both safety and visibility for large birds to roost and avoid predators. Moreover, not only did it offer an accessible roosting area but the convention center also hosted large crowds that would often leave behind excess trash and foods. In order to find a solution, the Orange County Convention Center contacted Bird•B•Gone® for assistance.

**Goal of Installation:** Prevent birds from landing on the convention center’s support beams, thus eliminating the negative aesthetic and health hazards of roosting pest birds.

**Product Installed: Bird Wire**

The bird control solution of choice for this job was Bird-B-Gone’s Bird Wire. Bird Wire is the best option for this scenario due to its ability to deter large birds from specific roosting locations. In this case, the pest birds were landing on large support beams throughout the convention center, leaving behind hazardous droppings. In order to protect the support beams, the Bird Wire system needed to cover the full length and width of the beam.

Bird Wire is an anti-perching system that offers both a low cost and low visibility solution for large bird infestations. It has the ability to wrap around a curved surface, such as support beams, and deter pest birds from otherwise challenging areas.

**Result:** A humane and highly effective Bird Wire installation that prevents birds from landing and roosting on the Orange County Convention Center.

birdbgone.com
Every spring, swallows migrate back to North America to build new nests for the coming summer. In recent years, swallows have made a home out of a local high school by building their cup-shaped mud nests under the school’s overhangs and ledges.

**Issues to be addressed:** The birds were leaving scattered droppings on the campus and walkways, causing both defacement and damage to the property as well as a health hazard for students, staff and teachers. The school faced costly maintenance and repairs if no action was taken to discourage the swallows from returning.

**Challenges to overcome:** Swallows are protected by the Migratory Bird Treaty Act of 1918, making it illegal to intentionally capture, kill or disrupt any migratory bird. Migratory birds must be deterred prior to or after they vacate the nest.

**Product Installed:** Bird-B-Gone® Bird Slope™

**Solution:** The building’s small eaves made Bird-B-Gone®’s Bird Slope™ an ideal solution for this situation. Bird Slope™ immediately removed the covered corners where swallows like to nest. The product also provided easy future maintenance as the panels can be painted anytime the building is painted. Slope was installed using Bird-B-Gone® mounting clips, easy “snap-on” extenders that allow the panels to cover wider spaces, along with “end caps” which prevent birds from getting behind the sloped panels. The technical team that installed the bird slope panels was properly trained and qualified by Bird-B-Gone®.

**Result:** The humane, effective bird deterrent kept the swallows from nesting under the school’s overhangs and ledges. No more swallows to deface and damage the school buildings. No more swallow-related health hazards for students, staff and teachers.
When trapping is necessary, Bird•B•Gone® has the widest selection of humane live traps available.

When there are 20 or more pest birds at a job site, trapping may be necessary to reduce the birds before you install a permanent bird control system. Trapping is often overlooked because it can be time consuming and an unpleasant part of the job. If left undone, however, your bird control product installation can be unsuccessful.

Bird•B•Gone’s® complete line of professional bird traps come in a variety of sizes to help accommodate the species of pest bird posing a problem, the size of the flock, and the location of where the trap is going to be placed.

Mist Netting is another technique to capture and release birds from enclosed areas. When the netting is hung directly in a bird’s flight path, the bird flies into the net, becomes immobile, and makes it easy to remove the bird and set it free outside of the structure.
MIST NET

ADVANTAGES & BENEFITS

When the netting is hung directly in a bird’s flight path, the bird flies into the net, becomes immobile, and makes it easy to remove the bird and set it free outside of the structure. The Mist Net is a simple, humane way to catch and release birds.

» Will not harm birds.
» Made from extremely fine fibers that birds cannot see.
» Designed to capture multiple birds with 1 net.
» Available in 4 sizes.
» Ideal for big box stores, warehouses, grocery stores or other indoor areas where birds are trapped.

MIST NET KIT

Our Mist Net Kit contains everything needed to capture and release trapped birds.

• Mist Net - 1 per kit (Choose one size)
• Telescoping Poles - 2 each
• Hook Attachments - 2 each
• Magnet Attachments - 2 each
• Laser Pointer - 1 each
• Carrying Case - 1 each
• Sparrow Charmer - 1 each with MISTCAP-KIT-CHRM & MISTCAP-KIT/20-CHRM

ADVANTAGES & BENEFITS

The Sparrow Capture Trap is a hanging trap designed for the capture of sparrows with multiple sensory luring capabilities.

» The perfect tool for control of pesky sparrows.
» Built to resemble a common birdhouse in order to conceal the trap.
» Spring-loaded door snaps when a sparrow enters and lands on a perch beneath the opening.
» Mirror located adjacent to perch to attract sparrows
» Includes mounting bracket to allow for easy placement.
» For maximum effect, lure sparrows in with Sparrow Charmer™.
» Simple assembly; assembles in minutes.

ITEM # DIMENSIONS
BMP-CAPTURE Pop up feature: Closed: 12”x6.5”x9”; Open: 18”x6.5”x11”
PROFESSIONAL BIRD TRAPS

COLLAPSIBLE PIGEON TRAP
ITEM #: BMP-PSCP
Easily to assemble and collapses to 1” (2.54 cm) high
One door on each side
Capacity: 18+ pigeons
14 lbs. (6.35 kg)
Dimensions: 40” x 22” x 12” (101.60 cm x 55.88 cm x 30.48 cm)

PIGEON MOTEL
ITEM #: BMP-SW-SPM
Ideal for commercial or residential use
Two one-way entry doors
Each door has a door guard
Easy to store and re-use
Portable
Capacity: 6+ birds
Lightweight 5 lbs. (2.26 kg)
Dimensions: 24” x 12” x 8” (60.96 cm x 30.48 cm x 20.32 cm)

COLLAPSIBLE PIGEON TRAP WITH SHADE
ITEM #: BMP-SW-CP-S
Four one way entry doors - one on each side
Easily assembles and collapses to 1” (2.54 cm) high
Hinged shade screen
Capacity: 12+ birds
Lightweight 8 lbs. (3.62 kg)
Dimensions: 35” x 16” x 8” (88.90 cm x 40.64 cm x 20.32 cm)

LARGE PIGEON TRAP WITH SHADE, FOOD & WATER
ITEM #: BMP-SW-LP-SFW
One 1-gallon water container and feeder pan
Six one-way entry doors with door guard
Divided trap with two access top doors
Hinged shade screen
Capacity: 30+ birds
16 lbs. (7.25 kg)
Dimensions: 45” x 24” x 10” (116.84 cm x 60.96 cm x 25.4 cm)

PIGEON TRAP WITH SHADE, FOOD & WATER
ITEM #: BMP-SW-SP-SFW
Three one-way entry doors with door guard
Centered top access door for easy removal of birds
Hinged shade screen
Water container and feeder pan
Capacity: 12+ birds
Lightweight: 10 lbs. (4.53 kg)
Dimensions: 35” x 16” x 8” (88.90 cm x 40.64 cm x 20.32 cm)

SLANTED SURFACE PIGEON TRAP WITH SHADE, FOOD & WATER
ITEM #: BMP-SW-AD-LEGS
One 1-gallon water container and feeder pan
Adjustable legs ideal for slanted surfaces
Six one-way entry doors with door guard
Heavy slide out galvanized flat pan and fold down landing platforms
Hinged shade screens
Capacity: 20+ birds
23 lbs. (10.43 kg)
Dimensions: 36” x 24” x 10” (91.44 cm x 60.96 cm x 25.4 cm)
## SNAP TRAP

**ITEM #:** BMP-SW-SNAP-S: 17” x 17” x 2.5” (43.18 cm x 43.18 cm x 6.35 cm)  
**ITEM #:** BMP-SW-SNAP-M: 24” x 24” x 2.5” (60.96 cm x 60.96 cm x 6.35 cm)  
Simple to use with proven results.  
When bait tray is triggered, a spring loaded nylon net closes over the birds to trap them quickly and safely.  
This trap can be mounted on buildings, walls, and trees.  
The snap trap is powder coated for rust resistance.

## SPARROW TRAP

**ITEM #:** BMP-SP2C  
Two chamber  
Bi-level repeating trap  
Dual level design eliminates captured feeling by birds  
Large capacity (can hold a large number of sparrows)  
Lightweight: 4 lbs. (1.81 kg)  
Dimensions: 16” x 12” x 8” (40.64 cm x 30.48 cm x 20.32 cm)

## SPARROW TRAP WITH FOOD & WATER

**ITEM #:** BMP-SW-SSP3-WF  
Two top access removal doors  
Bi-level eliminates captured feeling by birds  
Repeating trap  
Easy access to service feed and water station  
Six entry funnel doors (three per compartment)  
13 lbs. (5.99 kg)  
Dimensions: 36” x 24” x 10” (91.44 cm x 60.96 cm x 25.40 cm)

## BIRD HOUSE ENGLISH SPARROW TRAP

**ITEM #:** BMP-BHSPT  
Single Bird  
Bird-house design naturally attracts English Sparrows. When the Sparrow enters the house and lands to perch, the spring-loaded trap door snaps closed. Once the trap is closed, the fluorescent sticker will show through the hole located on the front trap door to let you know the trap is now occupied.  
Dimensions: 9”H x 5”W x 5.5”D

## SPARROW SKY TRAP

**ITEM #:** BMP-SW-SKY  
A hanging trap designed for the capture of sparrows and smaller birds in high traffic areas.  
Proven V-top entry design enables Sky Trap to hang from the ceiling or sit on a flat surface.  
Includes water and feed containers along with a perch to calm birds after capture.  
Dimensions: Closed: 24”W x 12”L x 18”H (60.96 cm x 30.48 cm x 45.72 cm)

## TRANSPORTERS

**Medium ITEM #:** BMP-SW-TRN-M  
**Large ITEM #:** BMP-SW-TRN-L  
Constructed of heavy 14- and 16-gauge welded wire  
Carrier collapses to 1” tall for storage  
Full wire floor with slide out galvanized flat pan  
Medium Capacity: 8+ birds  
Large Capacity: 25+ birds  
Medium Dimensions: 24” x 12” x 9” (60.96 cm x 30.48 cm x 22.86 cm)  
Large Dimensions: 36” x 16” x 9” (91.44 cm x 40.64 cm x 22.86 cm)

---

### TIPS & TRICKS

Use Sparrow Charmer™ to lure sparrows into traps.
REPELLENTS

Bird•B•Gone® offers a number of highly effective and humane bird repellents that are non-toxic to address these problems and keep areas bird free.

**Birds Deface and Damage Buildings/Structures**

Bird nests and feathers can clog rain gutters and downspouts, leading to roof leaks. This debris can also jam up AC units, window frames and rooftop vents. Bird droppings can deface and damage wood, metal, plastic and stone surfaces. Outdoor light fixtures, security cameras, and dish antennas can only take so much abuse from bird droppings before they begin to fail. The diseases carried by bird droppings can render surfaces unsanitary.

**Geese Destroy Lawns, Gardens and Water Features**

Pest birds like geese can quickly destroy golf courses, corporate lawns, parks and water features. These large birds can cover an area with unsightly and smelly droppings, which can ruin the aesthetics of a park or garden and contaminate fountains and water features.
Bird•B•Gone®
Authorized Installer
**ADVANTAGES & BENEFITS**

Bird-OFF™ Gel is used to keep pest birds off of horizontal surfaces. The unique combination of smells and the sticky sensation on their feet causes birds to stop landing on the surface and leave the area. Bird-OFF™ Gel causes no burning sensation and is safe for installers.

- Smell and sticky feeling on the feet of birds drives them away.
- Will not entrap non-targeted species.
- Lasts up to 1 year per application.
- Easy to clean up using soap and water.
- Virtually invisible.

**INSTALLATION**

To install: 4 inches wide top to bottom – (2, 3, 4 inch distance between waves, depending on bird pressure) **Do not install on a vertical surface.**
ADVANTAGES & BENEFITS

Transparent Bird Gel is a sticky gel used to keep pest birds off of horizontal surfaces. Birds can’t stand the sticky sensation on their feet and will move on.

» Creates a sticky surface that birds avoid.
» Not harmful to birds and people.
» Designed for pigeons and starlings, not for use for non-targeted species of birds.
» Lasts up to 6 months outdoors.
» Effective from 15° F (-9° C) to 200° F (93° C).
» Virtually invisible.

<tbody>
<tr>
<td>Transparent Bird Gel (12 tubes/case)</td>
<td>120’ (36.58 m) x 3” (7.6 cm)</td>
<td>TBG-CASE</td>
</tr>
</tbody>
</table>

INSTALLATION

To install: Gel is applied in a zig-zag pattern about 3” (7.62 cm) high leaving periodic spaces for water drainage. **Do not install on a vertical surface.**

DRIPLESS CAULKING GUN

This ergonomic gun makes installing gels easy.

See page 78

CAULK-ETS3000
Bird•B•Gone® Bird Hazer™ is an affordable and advanced hazing system that releases a fine fog of bird repellent into the air to deter pest birds from large open spaces.

» Effective for most pest birds including sparrows.
» Advanced nozzle design distributes fog particle size less than 1 micron.
» Saves money - uses significantly less liquid repellent than other hazing units.
» Each Main Control Unit can control up to 6 satellite units to help ensure full perimeter coverage.
» Designed for indoor and outdoor use.

**PATRIOT™ PORTABLE THERMAL FOGGER**

**ADVANTAGES & BENEFITS**

» Reliable performance.
» Produces large volumes of fog.
» The patented Starting System even enables use in areas where poor quality gasoline is all that is available.
» Designed from over 50 years experience and built to the highest quality standards, the Patriot™ will give superior performance with simplicity and durability.
» Patented Fuel Priming System eliminates need for pressurized fuel tank.
» A 12 volt starting system ensures reliable starting even when battery power declines!
BIRD HAZING

Bird Hazing has proven to be effective in dispersing pest birds where other methods of bird control may be ineffective or impractical. Bird Hazing units efficiently deploy a light fog or haze of bird repellent made with Methyl Anthranilate (a non-toxic, food-grade ingredient). The active ingredient irritates a bird’s mucous membranes. Birds find the sensation unpleasant and will subsequently avoid the area. The effect is temporary and will not harm the birds.

HAZING OR FOGGING?

<table>
<thead>
<tr>
<th>Hazing</th>
<th>Fogging</th>
</tr>
</thead>
<tbody>
<tr>
<td>Used in enclosed and semi-enclosed areas</td>
<td>Used in wide open spaces</td>
</tr>
<tr>
<td>Moves birds out of areas where they are roosting and nesting</td>
<td>Moves flocks of birds from open spaces</td>
</tr>
<tr>
<td>Creates a small particle mist</td>
<td>Creates a “wet fog”</td>
</tr>
<tr>
<td>Depending upon the unit, may be programmed or set to run in intervals</td>
<td>Usually applied with hand-held unit on a scheduled basis</td>
</tr>
</tbody>
</table>

WHERE IS BIRD HAZING RECOMMENDED?

Bird Hazing is particularly effective in removing birds from large indoor/outdoor areas, warehouses, aircraft hangars, and plant nurseries. It has been proven effective for driving out pigeons, seagulls, geese, starlings, and many other pest birds. We do not, however, recommend Bird Hazing for buildings that are heavily occupied and have large amounts of foot traffic.

HAZING VS. FOGGING

Bird Hazing is used when birds are a problem in enclosed to semienclosed areas, semi-enclosed docks, and overhangs. A light haze of bird repellent is created through a Bird Haze unit which, depending upon the features of the unit, can often be programmed or set to run in intervals. Bird Fogging is used in wide open areas where birds are a nuisance. Bird control fogs are used against flocks of birds that spend time in parks, golf courses, memorial parks and other large open spaces. The fog is created through the use of either a stationary or hand-held fogging unit. The units generate an aerosol of the Methyl Anthranilate. Foggers produce a “wet fog” that will not penetrate shrubs, so fogging is best used in the open areas that birds fly through or graze in. Fogging should be repeated as often as necessary to keep birds away.
AVIAN CONTROL™

ADVANTAGES & BENEFITS

Avian Control® uses cutting edge technology to efficiently repel undesirable birds without harming the birds, humans or other animals. The repellent is effective against flocking birds (starlings, blackbirds and others), robins, crows and pigeons.

» Non-lethal and mild enough to use around people and animals.
» Low cost, effective solution.
» Simple application via ground, aerial spraying, or fogging.
» EPA approved for use on numerous crops.
» For indoor fogging use: Undiluted at a rate not to exceed two (2) fl. oz. per 10,000 cubic ft.
» For outdoor fogging use: Undiluted at a rate of 12-16 fl. oz. per acre.
» Recommended spray application rate on turf is 12-42 fl. oz. per acre up to a maximum of 5 gallons per acre.
» Estimated coverage: 6 acres per gallon on turf; 9 acres per gallon when used with foggers.

ECOBIRD® 4.0

ADVANTAGES & BENEFITS

EcoBird® 4.0 was developed as a non-hazardous bird repellent, made from food-grade materials & is a naturally occurring Generally Regarded As Safe (GRAS) product. The active ingredient is a US EPA listed, & FDA Approved, compound used as a food flavoring and fragrance additive. It is a natural component of concord grapes and other plant materials.

» EPA approved: Safe for indoor and outdoor applications.
» Non-hazardous bird repellent made from food-grade materials.
» Does not harm birds, people, or pets.
» Ecological and economical.
» For use with mechanical spraying & fogging equipment.
» For indoor fogging use: Undiluted at a rate not to exceed one (1) fl. oz. per 10,000 cubic ft.
» For outdoor fogging use: Undiluted at a rate of 6-8 fl. oz. per acre.

EcoBird® is effective for all birds including: Pigeons, geese, grackle, starlings, dove, black birds, swallows, gulls, water fowl & many other birds that have become a nuisance and/or a health hazard in affected areas.

ITEM # ECOBRD-40
WHERE TO USE Grain storage and manufacturing facilities, airports and hangars, parking and car wash facilities, landfills, golf courses, and more.
ACTIVE INGREDIENT 40% Methyl Anthranilate
AVIAN MIGRATE™

ADVANTAGES & BENEFITS

Avian Migrate™ is a non-toxic repellent that discourages geese and other birds from congregating on golf courses, parks, athletic fields, airports, vineyards and other areas where birds are grazing. Using a unique patent pending formula, Avian Migrate™ irritates the birds’ mucous membranes causing them to avoid the area.

» Best applied with spray equipment such as garden sprayers or foggers.

» Contains a breakthrough technology that uses a special colorant, visible only to birds, that let them know that the area has been treated. This teaches unwanted birds to stay away in the future.

» Does not harm grass, shrubs and other vegetation and is not easily rinsed away by rain or sprinklers.

» The ingredients are GRAS by the US Food and Drug Administration.

AVIAN FOG FORCE™ TR

ADVANTAGES & BENEFITS

Avian Fog Force™ TR Bird Repellent is a non-lethal automated time-release aerosol bird repellent. Avian Fog Force™ TR programmable spray mist dispenser cabinets dose the appropriate amounts. Each dispenser cabinet releases an invisible intermittent aerosol bird repellent mist on a user selected programmable time-release basis. Spray mist dispenser cabinets can be placed strategically in areas where nuisance birds are a problem. Dispenser cabinets are powered by two “D” batteries that last up to six months.

Avian Fog Force™ TR is not available for sale in the state of Alaska, California or Hawaii. Avian Fog Force TR is available for sale to licensed pesticide applicators in the state of New York.

The repellent is effective against geese, mute swans, coots and small birds.

For many stores, pest birds, droppings, and nesting materials pose serious health and safety issues which may result in lost revenue and fines. Bird·B·Gone® offers a variety of solutions to help you rid pest birds from stores and other large contained areas.

As with all bird control jobs, evaluate the extent and the root of the problem. Identify the bird species and how birds are entering the building (gaps, broken windows, old pipe chases, etc.). All areas should be repaired; bird nests and bird droppings properly removed. Be sure to remove all food, water, and clean-up any spills that would attract birds. As birds often enter through overhead doors, we suggest the installation of Bird·B·Gone® Vinyl Strip Doors or Bird·B·Gone® Bird Net Curtain to help keep birds out.

Once birds occupy the interior of the building, the most effective method for deterring and removing birds will involve a combination of one or more methods depending upon the situation:

**Sparrows and other small birds:** We highly recommend Bird·B·Gone® Mist Net that can be hung parallel to the point of entry (e.g. loading docks) allowing for the humane capture of multiple birds for proper release. Combine Mist Net with the Bird·B·Gone® Sparrow Charmer™, a field tested audio calling device that lures sparrows into netting and traps through the broadcast of Bird·B·Gone®’s proprietary sparrow call.

**Highly visible and high-traffic locations:** Use the Bird·B·Gone® Sparrow Sky Trap, a bird trap that can be hung from the ceiling and includes a tray that securely captures droppings or other debris. Combine with Bird·B·Gone® Sparrow Charmer™ for maximum results.

**Large, “open” indoor/outdoor areas:** We recommend the use of Agrilaser® Lite and Bird Hazing. Agrilaser® Lite repels birds with patented optical technology. Birds perceive the laser beam as an approaching physical danger and fly away in search for safer grounds. After systematic use, the birds will consider the area in which the Agrilaser® Lite is used as unsafe and will not return. Bird Hazing—dispersing a light haze/fog of Methyl Anthranilate (non-toxic, food-grade ingredient) through the air which irritates the birds’ mucous membranes causing them to subsequently avoid the area. However, we do not recommend Bird Hazing for buildings that are heavily occupied by people and have large amounts of foot traffic.

**Larger birds including pigeons:** A combination of Agrilaser® Lite, humane trapping, and bird hazing is strongly recommended. To ensure you have the correct traps based upon flock size and location, call our Bird Control Experts at 800.392.6915.

While the removal of pest birds may appear to be a challenge, you can safely remove birds from the premises and prevent them from returning with cooperative personnel and the right combination of products.

Should you require assistance, please contact our Bird Control Experts at 800.392.6915. We will be more than happy to provide you with the assistance needed to ensure you have the right products specified to resolve the bird problem properly and efficiently.

birdbgone.com
Bird•B•Gone® offers additional materials to make your pest and bird control jobs easier, safer and efficient. We can be your one-stop-shop to cut time and hassles.

**Adhesives:** Many bird control products glue easily into place. Construction grade adhesives should be used to ensure proper installation of bird control products.

**Cleaning Supplies:** When pest birds gather and roost in, on or near human habitable areas, they can quickly pose a number of health and safety hazards. To help prevent the problems bird droppings can cause, Bird•B•Gone® can recommend the right combination of sanitation products and PPE (Personal Protective Equipment) to get the job done right.

**Marketing Materials & Resources:** We have marketing and sales materials available to help you get the word out and grow your business. We also offer training videos and professional bird control tips with our Two Minute Tuesday videos to help you with products, installation, safety & sales.
# Adhesives and Sealants

**Sikaflex® Gray Adhesive Glue**  
Construction grade polyurethane adhesive designed for outdoor use that will not sag, drip or run. Use with Bird Spikes, Bird Jolt Flat Track™, Bird Spider 360°™, Bird Slope™ and Bird Wire.

<table>

**INDUSTRIAL SPRING CLAMP**

The rugged Bird-B-Gone® industrial clamps have a variety of applications. Chief among these is their use in securing fumigation tents to prevent gas leakage and keep out pets and children.

- 1” grip opening
- Steel jaws for longer tool life
- Heavy duty tempered wire springs for fast, reliable opening and closing
- Point-of-pressure remains near jaw tips for positive clamping
- The spring action in each clamp is designed for one-handed operation, so attaching/detaching is quick and easy

**BIRD NET CURTAIN**

Bird Net Curtains enable roll up doors to remain open for ventilation during working hours and significantly reduce the opportunity for birds to enter the building. Each Bird Net Curtain is custom cut based upon your specifications and door frame size. Choose from three sizes of bird net - 3/4", 1-1/8" & 2" mesh depending upon the type of bird you wish to keep out. Bird Net Curtains easily open and close to allow for in-and-out traffic.

- Keeps birds from entering warehouses, loading docks, and manufacturing plants
- Uses Heavy Duty Bird Net 2000™ hung as a curtain to keep birds out
- Easily installed using the included bird net hardware and industrial curtain track

**THE DEFENDER™ PREMIUM VENT COVER**

Birds and squirrels can be persistent in making a home inside your house. The Defender™ keeps them out.

- Zinc coated steel delivers lasting protection
- Vertical bars keep creatures out while minimizing lint buildup and make cleaning easy
- Helps hide unsightly vents
- Works on all siding types
- Available in white finish and 2 sizes: 6.5" and 8"

VISUAL & PHYSICAL BIRD DETERRENTS

**REPELLER 360°**
- Uses sustainable wind energy
- Ideal for docks & boats
- UV protected - designed for outdoor use
- Sweeps birds continually in a 6’ diameter

**SOLAR BIRD REPELLER**
- Solar powered with rechargeable batteries that store power for use in low or no light
- Sweeps birds continually in a 5’ diameter

**BIRD SCARE ATTACK SPIDER**
- Ideal to keep woodpeckers and other pest birds from attacking the sides of your home or business
- Battery operated (not included)
- Sound or vibration activated

**FLASH TAPE**
- Iridescent foil tape scares birds away with reflective surface
- Ideal for use in gardens, trees, pool areas, outdoor patios, gazebos, and more

**REFLECTIVE SCARE BIRD DIVERTERS**
- Iridescent foil “predator” eye scares birds away
- Easy to install
- Will not damage trees or plants
- 5 diverters per pack

**BIRD-B GONE® BALLOON**
- Inflatable visual scare device
- Confuses birds with life-like reflective “predator” eyes
- Includes flash tape
- Ideal for use in fruit trees, patio covers, pool areas, gazebos, etc.

**RED TAIL HAWK COPPER MESH BEAKGUARD®**

**RED TAIL HAWK**
- Birds identify hawks as predators and will leave the area where the decoy is present
- Easy to install, extremely versatile
- Low-cost effective solution

**COPPER MESH**
- Ideal for roof tiles and open spaces around dryer vents
- Packs tightly into cracks and holes for exclusion of pests and birds

**BEAKGUARD®**
- Environmentally friendly deterrent coating; will not harm woodpeckers
- Easy to apply to almost any surface
- Durable and weather-resistant
- Effective quickly after application
- Custom colors available
- Coverage 180 sq. ft. (16.72 sq. m)

Our display case is the perfect visual tool to bring along when giving a sales presentation on bird control services. USB flash drive that contains a digital interactive display case showcasing our products, case studies and specs. We offer free customized “sell sheets” you can give to existing or potential customers to let them know you provide bird control as a service. When displayed on your vehicle, this waterproof vinyl sticker is perfect for letting customers know you can help them with their bird control needs.

Our goal is not to just sell products, but to help position our customers to make the best quality decisions when it comes to choosing, designing, specifying and installing the right bird control products for your specific bird problem.

We have everything you need for a successful bird job in our online bird control resource center including information on pest birds, the diseases associated with birds, case studies, installation instructions, product literature, architectural specifications and more!

Bird•B•Gone® Gives Back

Through your continued support of Bird•B•Gone®, we have been able to provide COTN in Sierra Leone with a brick making machine. This machine creates bricks out of local materials to create homes, classrooms and hospitals.

cotni.org  360.698.7227

BIRD•B•GONE® DORMITORY
Bird-B-Gone® revolutionized the bird control industry in 1992 by inventing and patenting the first plastic bird spike.

We continuously innovate and strive to provide the highest quality, most effective, efficient and reliable bird control methods on the market.

With 58 issued patents worldwide, Bird-B-Gone®, is known as a manufacturer of quality bird control products.

Bird-B-Gone® Gives Back

It’s more than just bird control products... It’s Faith, Family & Friends!

Our motto is “It’s more than just bird control products, it’s faith, family and friends.” We don’t just say it, we live it! Bird-B-Gone® has teamed with Children of the Nations, (a nonprofit organization that provides holistic care to orphaned and destitute children across the globe) to help fund the building of orphanages in Sierra Leone, Africa. We couldn’t do it without you! Your continued support of Bird-B-Gone® allows us to make a life-saving and positive impact on impoverished and orphaned children’s lives!
