

Bird•B•Gone® Bird Hazer™

Bird B Gone® Bird Hazer™ is an affordable and advanced hazing system that releases a fine vapor of bird repellent into the air to deter pest birds from large open or semi enclosed spaces.

Advantages & Benefits

- Innovative technology compresses Methyl Anthranilate into the finest vapor
- Reliable, field tested by Bird B Gone technicians
- Simple to install and operate; plug-n-play
- Adds recurring revenue to your bird control business; one liter tank lasts approximately 1 month
- More efficient and cost effective than other bird hazing units:
 - Covers more area using less product
 - Smallest particle size – less than one micron
 - Vapor stays airborne longer
 - Multi-head unit vs. single head unit offers greatest coverage
- Effective against all birds, including sparrows
- Weatherproof design guarantees reliability
- Setup consultation, support and installation video with every unit
- One year manufacturer's warranty

3 Piece Kit	HAZR-3KIT Includes main control unit, 3 satellite units and installation accessories
6 Piece Kit	HAZR-6KIT Includes main control unit, 6 satellite units and installation accessories
Main Control Unit Dimensions	14" x 16" x 6"
Satellite Dimensions	14" x 6" x 6" ea.
Main Control Unit Weight	32 lbs
Satellite Weight (Empty)	4 lbs ea.
Main Control Unit Material	Weatherproof NEMA polycarbonate
Satellite Material	Powder-coated metal
Haze Particle Size	Less than 1 micron
Tank Size	1 liter ea.
Material	Powder-coated Metal

Bird Hazing

Bird Hazing has proven to be effective in dispersing pest birds where other methods of bird control may be ineffective or impractical. Bird B Gone Bird Hazer™ efficiently deploys a light vapor of bird repellent made with Methyl Anthranilate (a non-toxic, food-grade ingredient).

Where is Bird Hazing Recommended?

Bird Hazing is particularly effective in removing birds from large indoor/outdoor areas, warehouses, aircraft hangars, plant nurseries, outdoor eating areas and more!

Installation

Choose the best location for the control unit based on proximity to a power source and accessibility. A series of satellite units will connect in succession from the control unit to cover your desired area. Setting up units around the perimeter of the target area will ensure full coverage. Place satellite units 40-60 feet apart for best results.

EcoBird 4.0- New formula delivers results!

Bird B Gone Bird Hazer™ is designed for use with EcoBird 4.0 - the most effective MA on the market. Mild-scent. Humane. Economical. EPA approved. Safe for indoor and outdoor applications.
