

WHAT BIRDS WILL BIRD-OUT REPEL?

Bird-Out repels the following birds: rock dove and domestic pigeons (*Columba livia*), starlings (*Sturnus vulgaris*), gulls (subfamily Larinae), blackbirds including grackles (Family Icteridae), cliff swallow (*Hirundo fulva*), house (English) sparrow (*Passer domesticus*), house finch (*Corpodacus mexicanus*), American crow (*Corvus brachyrhynchos*, *Coruvs ossifragus*) as well as these wild migratory waterfowl: geese (*Anserinae*), mute swan (*Cugus olor*), and Coot (*Fulica Americana*).

HOW DOES BIRD-OUT REPEL BIRDS?

Bird-Out cartridges utilize the active ingredient Methyl Anthranilate (MA) at a 20% concentrate. MA is a food-grade ingredient proven to repel birds. Bird-Out passively wicks the repellent into the surrounding environment (20' x 20' x 20' area) to repel birds with the sense of smell.

HOW LARGE OF AN AREA DOES BIRD-OUT COVER?

Each Bird-Out Kit will repel birds from up to a 20'x 20' x 20' area (8,000 cu. ft.) for up to 60-days. Additional kits can be installed to increase the area of coverage. Think of it as a 20-ft diameter circle, the closer you are to the center of the circle (Bird-Out) the more effective the repellent will be. Many users have had success spacing dispensers 15-ft apart. Shortening the distance between each dispenser will increase the effectiveness of the aromatic repellent.

WHAT IS BIRD-OUT MADE FROM?

The active ingredient in Bird-Out is a 20% concentrate of Methyl Anthranilate (MA), a food-grade ingredient proven to repel birds.

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Use only as directed on label. This product cannot be applied in areas when non-target birds or Threatened or Endangered Birds may be present. Do not apply directly to water, such as lakes, reservoirs, ponds, streams and canals; however, overspray to water bodies can be expected with proper use of this product. This product is currently going through EPA registration and may not be available for immediate sale in all states.

WILL THIS BOTHER MY PETS?

The active ingredient Methyl Anthranilate will only affect birds. Other terrestrial animals and people will not be affected.

WILL BIRD-OUT STOP BIRDS FROM NESTING?

Although Bird-Out may help repel birds, we do not recommend it as a primary repellent for nesting birds. If you are experiencing nesting birds or a heavy bird infestation, additional bird deterrents such as bird netting or other exclusionary methods may be needed. For nesting birds, please contact our product support team at nobirds@birdbgone.com or at 1-800-392-6915 for expert recommendations.

WHERE SHOULD I INSTALL BIRD-OUT?

Install Bird-Out in outdoor areas where birds like to roost such as balconies, decks, patios, garages, tool sheds, warehouses, barns, building ledges, outdoor dining areas, windowsills, backyards, and other outdoor areas.

CAN YOU INSTALL BIRD-OUT CARTRIDGES WITHOUT THE DISPENSERS?

No, Activated Cartridges should never be installed without the Bird-Out Dispenser unit. Bird-Out Cartridge are designed specifically to be used in conjunction with the Dispenser unit. Leaving activated Cartridges outside the dispenser will leave it prone to tipping over, leakage, and becoming damaged.

CAN YOU INSTALL BIRD-OUT HORIZONTALLY?

The Bird-Out Kit, cartridges, and dispensers should NEVER be installed horizontally. Activated cartridges should only be installed vertically as shown in the instructions.

WHAT IF I DON'T HEAR THE 'CLICK' WHEN I TWIST THE CARTRIDGE BUT CAN SMELL THE PRODUCT?

If you have twisted the cartridge and do not hear a click but can smell the repellent, this means you have not fully activated the cartridge. Inside the Bird-Out cartridge is a foil seal that houses the bird repellent until it is activated. This foil seal may not have been fully punctured to activate cartridge. To fully activate your Bird-Out cartridge, twist clockwise an additional two to three times. Although the 'click' may not be audible, this motion will ensure the foil seal has been fully activated. Now that the cartridge is activated, please insert the cartridge back inside the dispenser and close. Replace cartridge after 60-days.

HOW DO YOU MOUNT THE DISPENSER?

The Bird-Out dispenser can be mounted using the adhesive strip backing or anchored using the included screws and drywall anchors.

HOW LONG DOES EACH CARTRIDGE LAST?

Each Bird-Out cartridge will repel birds for up to 60-days, after which you will need to replace them with a new cartridge.

DOES BIRD-OUT REQUIRE BATTERIES?

Bird-Out does not require the use of batteries. The kit uses passive scent technology to wick the repellent into the surrounding area.

SHOULD I SHAKE THE BIRD-OUT CARTRIDGE?

Never shake the Bird-Out cartridge. To activate, fully twist the

cartridge clockwise and place into the dispenser in a vertical position.

WHEN DOES BIRD-OUT WORK BEST?

Bird-Out works best as a preventative measure. Installing Bird-Out before birds arrive in the spring season or before there is an existing bird problem will ensure a bird free environment

WHAT IS THE SHELF-LIFE OF BIRD-OUT?

Bird-Out cartridges have a shelf-life of 1-year. After this time period, cartridges will begin to lose its effectiveness. We recommend replacing activated cartridges every 60-days or sooner.

WILL BIRD-OUT BE AFFECTED BY RAIN?

Rain may reduce the efficacy of the product. When rain is experienced, we recommend removing the Bird-Out cartridge to store it in an airtight container. Store cartridges in an upright vertical position, never store activated cartridges in a horizontal position. Wear proper PPE when removing cartridges.
