

# Bird•B•Gone® Flame Net

Bird•B•Gone® Flame Net is a flame-resistant polyethylene net used to humanely block pest birds from entering unwanted areas. Interwoven with a self-extinguishing strand of red monofilament, this specialty bird net is ideal for use within indoor structures such as airplane hangars, large warehouses and various residential settings.

## Advantages & Benefits

- ▶ 3/4" mesh excludes all birds
- ▶ ISO 1806 and 9001 protocol tested
- ▶ Net extinguishes itself using a revolutionary red strand of monofilament
- ▶ Break strength in excess of 33 lb.
- ▶ High resistance to acids and alkalis
- ▶ Non-conductive and virtually invisible
- ▶ Super strong, light and easy to install
- ▶ Uses the same installation hardware as Bird•B•Gone® Heavy Duty Bird Net

Bird Species	All species
Where to Use	Warehouses, airplane hangars, and other enclosed structures.
Bird Pressure	Light to Heavy
Warranty	10 years

### Technical Data

Material	U.V. stabilized knotted polyethylene net. Flame resistant (270°F melting point). Rot-proof, non-conductive and stable in sub zero temperatures.
Construction	12/6 Flame Net, comprised of 6 monofilaments, each 12/1000" thick with U.V. stabilizers added. Monofilaments are twisted together to produce a strong twine with 610-630 twists per meter.
Break Strength	ISO 1806 / 9001 protocol mesh tested in excess of 33 lbs. Test Report Available.
Flame Additive	One red monofilament comprised of Decabromodiphenyl and Antimony Trioxide.
Flame Testing	Tested per UL 94-92 with preparations in ASTM D4706-16 and CRT. Conditioning (pre-annealing) in accordance with ASTM D618-13. Test Report Available.

### 3/4" Flame Net

Part #	Area	Color
034BFR50X100	50' x 50' (15.24 m x 15.24 m)	Black
034BFRCUSTOM	Custom: Includes FREE extra foot	Black
