

Installation Instructions

Sparrow Sky Trap

Thank you for purchasing the Bird • B • Gone® Sparrow Sky Trap. For best results please read these instructions before using and retain them for future reference.

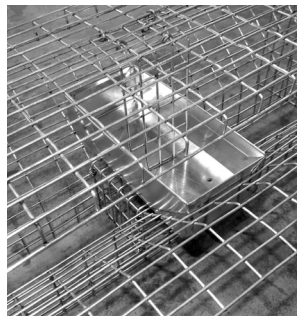

Sparrow Sky Trap Overview:

The Bird • B • Gone® Sparrow Sky Trap is a hanging trap designed for the capture of sparrows and smaller birds in high traffic areas.

- Proven V- top entry design enables Sky Trap to hang from the ceiling or sit on a flat surface.
- Pop-up feature makes this trap 24" x 12" x 18" high.
- Wider/longer pan (30" x 16") captures droppings or other debris that may fall from the inside the trap.
- V- top includes built-in feed pan that lures birds to the top of the trap.
- Perch placed inside of the trap calms birds after capture.
- Includes water/feed containers.
- Full wire floor.
- Simple assembly; assembles in minutes.
- Trap and slide-out pan can be easily cleaned.
- Slide-out pan constructed of heavy 26 gauge sheet metal.

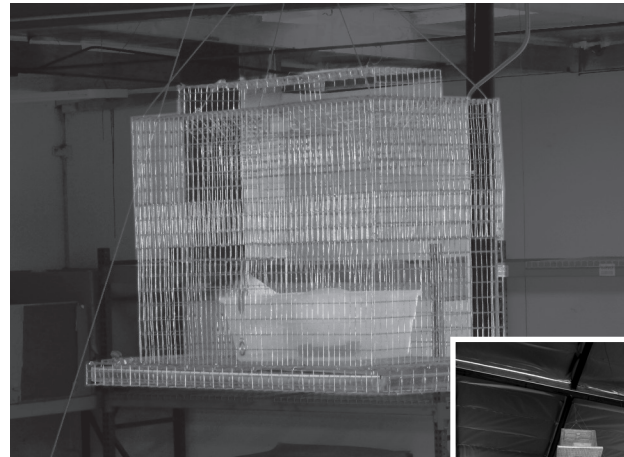

Included in the box:

- 1 – Trap with slide out pan
- 1 – V Top assembly with small pan
- 1 – Food container
- 1 – Packet of zip and wire ties for side assembly
- 1 – Water container
- 1 – Plastic perch
- 1 – Cable extension and snap link

Using the Sparrow Sky Trap

- 1) Remove V top from top of trap
- 2) Trap will extend out – from all 4 sides.
- 3) Lift up 1 short end and 1 long end to form corner of trap. Use zip and wire ties approximately every 3"–4" along outside corner from bottom to top of trap. Place wire tie on top corner of 2 sides to start to form rectangle of trap.
- 4) Lift up other long side, repeat step #3.
- 5) Lift last small end, repeat step #3.

- 6) This will form rectangle box above slide out pan with all 4 sides of 2" bent wire facing inside of opening of trap. Pull wire cable from bottom corner up, (inside corner of trap), placing loop end through inside corner of 2 sides. Cable comes out of top of corner.
- 7) Repeat step #6 for other 3 corners.
- 8) Place water and food container on floor of trap.
- 9) Place V top inside of top of trap. Spring secures V top lid to trap holding small feed pan in place.
- 10) Plastic perch can be inserted from inside or outside of trap. Keep the perch below V top approximately 3"–5".
- 11) Pull short cable through all loops of cable ends. Attach snap link to connect both ends of short cable. This will level out the trap when suspended.
- 12) Fill water container and place desired bait/seed in small top pan as well as inside of food container.

CAUTION

Always use caution when suspending trap at any height.
