

BeakGuard® - Woodpecker Deterrent

Bird Species	Woodpeckers
Where to Use	Exterior surfaces including wood, fiber-cement, stucco, aluminum or vinyl
Material	Elastomeric acrylic paint
Bird Pressure	Light to Heavy

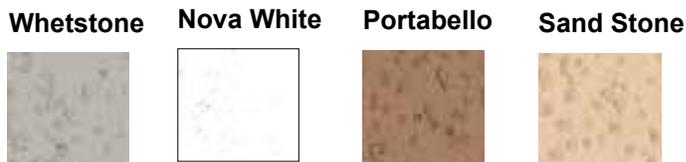

Paint Woodpeckers Away

BeakGuard® is an elastomeric acrylic finish that applies to surfaces like standard latex paint, including: wood, fiber-cement, stucco, aluminum or vinyl. BeakGuard® offers outstanding durability, extended service life, maximum dirt pick-up resistance and weather-ability in a vapor permeable, flexible membrane with exceptional color retention.

Product Features:

- ▶ Environmentally friendly; it will not harm woodpeckers or other bird species!
- ▶ Applies easily to almost any surface!
- ▶ Durable and weather-resistant!
- ▶ Applies like latex paint!
- ▶ Effects are virtually immediate!

Available in Four Colors: (Custom colors available)

BeakGuard® will not harm woodpeckers or any other bird species. The National Safety Council and American Medical Association recommend similar agents be used, along with other safety measures, in products defined as mild to moderately toxic.

Application:

BeakGuard® may be applied by brush, roller, paint pad or appropriate spray equipment. Thinning of the product is not recommended. BeakGuard® should be screened prior to spray application. Back-rolling is recommended when applying over acrylic finishes or other textured substrates.

One gallon covers approximately 180 sq. ft.
