

Repeller 360°®

| | |
|---------------|---|
| Bird Species | All birds |
| Where to Use | Ledges, signs, rooftops, I-beams, parapet walls, conduit, flat or curved surfaces |
| Material | Lightweight flexible UV stabilized PVC with knitted wire mesh "tube-in-tube" design |
| Bird Pressure | Light to Heavy |

The Bird•B•Gone Repeller 360°® moves with the wind to deter birds from landing on boats, docks, signs, A.C. units, and other areas.

- ▶ Wind powered - green product
- ▶ Covers a 6 ft diameter
- ▶ Will not blow off in heavy winds

Advantages & Benefits

- ▶ Wind powered - no electricity needed
- ▶ Spins continuously to prevent birds from landing
- ▶ Reflective "predator eyes" on "sails" help deter birds from the area
- ▶ Variety of mounting bases available
- ▶ Helps eliminate unsightly messes and stains caused by bird feces
- ▶ High wind tested - will not break or fall off in high wind areas
- ▶ Easy to install; easy to store
- ▶ Made in the USA by Bird•B•Gone®, Inc.

Patent pending clip keeps Repeller 360°® in place during high winds.

"Predator Eye" helps to scare birds from the area.

Ideal for use on boats.

Ideal for:

- ▶ Light Posts
- ▶ Boats
- ▶ AC Units
- ▶ Signs
- ▶ And More
